COMPANY PROFILE

Our company has experience in the field of commercial information processing since 1972. We especially value the policy of long-term cooperations with our clients.

We have a broad range of services:

- **Professional Testing Solutions**
- **Requirements Engineering**
- **Telecommunications and Utility Billing Systems**
- **Euro Preparation for Companies in New EU Member Countries**
- **EDIFACT – DATANORM – ELDANORM – ETIM Interfaces**
- **Data Exchange with Banks and Credit Card Companies**
- **Total Quality Management - Good Manufacturing Practices**
- **IT Service Management - IT Infrastructure Library (ITIL)**
- **Knowledge Management Solutions**
- **IT Fitness for GAAP – IAS – FSAB**
- **Balanced Scorecard**

The company owner, Dr. Wolfgang J. Schneider, started to work as a programmer during his studies at law school and has developed IT solutions for many companies in Europe, Africa, and the Americas since 1972. He worked on assignments in Germany, the United States, Canada, Ecuador, Nigeria, the Netherlands, Ireland, Slovakia, Slovenia, and Switzerland. He also attended a program at Harvard Law School and is a Certified Quality System Manager of the European Organization for Quality. He had the chance to attend a special class held for a selected group of Austrian management consultants with the leading scholar in knowledge management, Prof. Hirotaka Takeuchi of Harvard Business School. He is also a Certified IT Consultant (CITC), holds an ITIL certificate, is a Certified Tester (ISTQB Full Advanced Level), a Certified Professional for Requirements Engineering (IREB), and a Quality Assurance Management Professional.

Dr. Schneider holds membership in many professional organizations:

- **American Bar Association**
- **American Chamber of Commerce in Austria**
- **Association for Computing Machinery**
- **Austro-Arab Chamber of Commerce**
- **German American Lawyers Association**
- **Harvard Club of Austria**
- **Institute of Management Accountants**
- **National Association of Software Programmers and Consultants**

EXPERTISE

Due to the international interdependence of our customers we are experienced in multi-national environments and design, audit, and evaluate accounting / reporting systems according to FASB, IAS and GAAP standards.

Our company has accumulated many years of knowledge in quality management and application testing. Many years before ISO 9000 was a topic in Austria, we had to develop quality systems at a time when quality standards existed just for the pharmaceutical and automotive industries. We are now in a position to apply this knowledge to any type of software application.

We have handled many IT audits for our clients with international companies like KPMG Peat Marwick, Price Waterhouse, Barclays, American Express Bank, and the Music Corporation of America. We also have auditing experience with the German Federal Bank Authorities.

THE EURO CURRENCY

During the late nineties, our company was involved in the "Euro Fitness Program" of the Austrian Chamber of Commerce. Dr. Schneider is an expert who was in charge of the Euro projects of a number of companies and is also holding seminars about the impact of the Euro on IT systems. This experience was already successfully used during the integration process of the first new EU member switching to the Euro, Slovenia.

TELEPHONE BILLING SYSTEMS

Since 1998, we were in charge of the financial parts of the acceptance tests of two telecommunication billing systems in Austria: Mobilkom Austria and tele.ring. Part of this task was also design consulting for the Euro functionality and the G/L interfaces. This experience was used in our third project, Vodafone in Germany, and the fourth, NITEL and MTEL in Nigeria, where we set up the testing teams for Interconnect, ITU, Mediation, and Activation. The follow-up project was the Euro conversion of Vodafone Slovenia.
